<JOB AID> Outboard Portable Fuel Tank Filter Maintenance

Overview

According to the Outboard Portable Fuel Tank Safety Recall /Product Update(PUD)Campaign on June 2012. We would like to advise "Fuel Tank Filter Cleaning Procedure" for your support dealers. Please be assure fuel filter maintenance accordance with the following procedure.

Filter Manitenance Procedure

⚠ WARNING

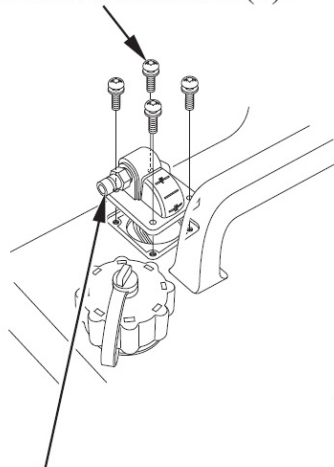

Gasoline is highly flammable and explosive. You can be burned or seriously injured when handling fuel.

- Keep heat, sparks, and flame away.
- Wipe up spills immediately.
- Handle fuel only outdoors.

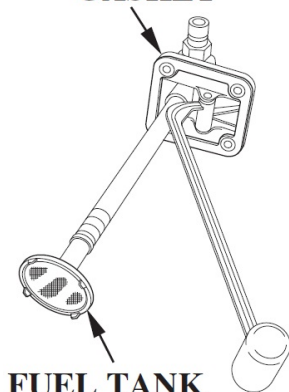

1.Remove fuel tank cap and drain the remaining fuel from tank.

2.Clean the inside of tank with nonflammable solvent, and dry the inside of tank thoroughly.

3.Remove the four 5 mm screws using a flat screw-driver, then remove the fuel hose connector and fuel tank filter from the tank.

5 mm SCREWS (4)**FUEL TANK FILTER JOINT
(Fuel Hose Connector)**

4.Clean the filter in non flammable solvent. Inspect the fuel tank filter and the connector gasket. Replace them if damaged.

**CONNECTOR
GASKET****FUEL TANK
FILTER**

5.Reinstall the filter and hose connector in the fuel tank. Tighten the four 5 mm screws securely.

CAUTION: Do not use any machine screwdriver when you tighten the screws. It may cause any damage on gasket.

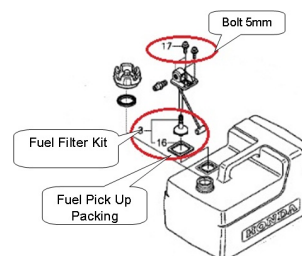

6.Confirm that there is no fuel leakage from connector gasket by using non flammable solvent before use on boat.
