Corrosion on the gear case

Symptom

Customer noticed an corrosion on the gear case after 3 months of usage.

Causes

<Analysis result>

Electric corrosion due to luck of continuity between gear case and anode metal.

1.Anode metal contact point was masked by gear case paint.

2.Gear case drawing did not indicate paint masking on anode metal contact point.

Countermeasure

1.Paint masking fixture was changed.

2. Gear case drawing was revised.(add paint masking indication)
